**SING-GIUM INTERNATIONAL PARTNERS WITH
TREND MICRO TO INTRODUCE ANTIVIRUS SERVICE
ON DEMAND IN SINGAPORE**

HouseCall is the first online antivirus prepaid system in Singapore that enables users to scan, detect and remove malware from their infected PCs without any security software installation or update

Singapore. June 20, 2006 – Sing-Gium International, a leading provider of online games and services in Asia Pacific, today announced it has partnered with Trend Micro to introduce HouseCall, an online malware (malicious software) scanning and removal tool, and the HouseCall Antivirus Prepaid Card, in Singapore. The HouseCall Antivirus Prepaid Card which is valid for 30 scans within a 90-day period, is now available at all major IT retail stores, convenience stores and leading bookstores across Singapore for S\$8.90.

HouseCall is a simple-to-use and cost-effective method in removing viruses, worms, Trojans, adware and spyware from infected PCs. It offers an additional choice on the antivirus and Internet content security software market today, through the scanning, detection and removal of harmful malware from infected systems without the need for any software installation or update.

“HouseCall is primarily targeted at users who do not necessarily have the latest antivirus or security software installed on their computers,” said Jeffrey Tan, Executive Manager of Sing-Gium International. “HouseCall is simple to use, highly affordable and always updated to provide effective malware removal for both home and corporate users. It is also particularly convenient and helpful to users of wireless Internet access at Wi-Fi hotspots, and those travelling frequently on business.”

The suggested retail price of HouseCall is 90 per cent lower than the average price of antivirus software available on the market. Customers can purchase access codes and passwords directly from HouseCall online at www.housecall.com.sg. Alternatively, they can

also purchase the HouseCall Antivirus Prepaid Card, which contains a set of access code and password, from all major IT retail stores, convenience stores and leading bookstores in Singapore. The prepaid card is priced at S\$8.90, and is valid for 30 scans within a 90-day period.

“We are pleased to have engaged Sing-Gium International as the partner of choice to offer our Web-based malware scanning and removal tool to the Internet users in this region, which is in line with the aggressive expansion of our service-based offerings to both consumers and enterprises,” commented Marvin Chiu, Managing Director of Asia Pacific Consumer Sales and Marketing at Trend Micro.
